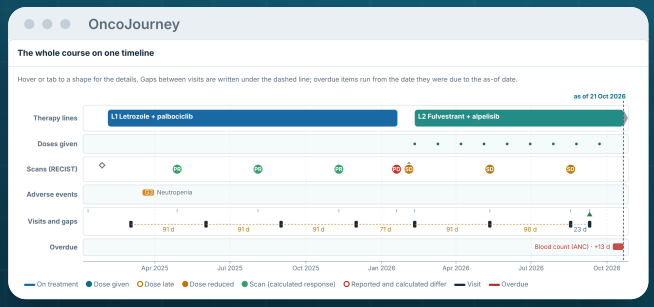
OncoJourney Platform

by Curiouspods Learning Pvt. Ltd.

Greater clarity for your clinical practice.

A platform that brings together patient medical records, treatment history and clinical outcomes into one unified view of the cancer journey.

Free for 3 months · No obligation to buy



Sample data. No real patients.

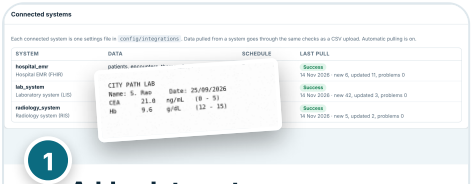
Every patient's story is spread across places

Reports sit on paper and in different systems. Before each visit, you first find them and bring them together.

Paper reports · One system · Another system

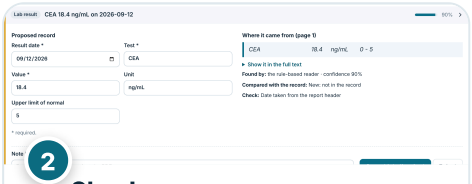
How it works: three easy steps

Sample data. No real patients.



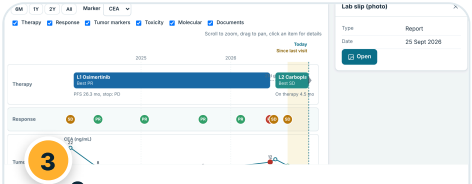
1 Add or Integrate

Upload PDFs or photos of paper reports, or connect your hospital's record, lab and radiology systems.



2 Check

Review the dates, medicines and test results OncoJourney picks out. Accept or correct them.



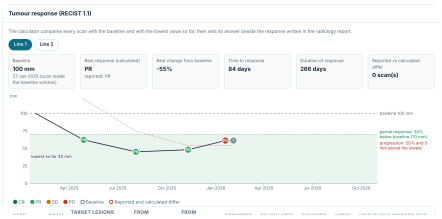
3 See

The full journey on one timeline. Click any item to open the original report.

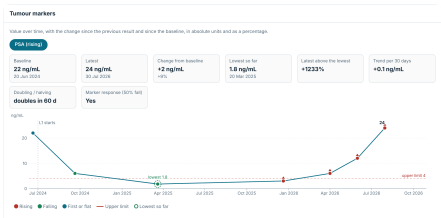
Everything at a glance

- Treatments so far, and how long each lasted.
- What the reports say about how the cancer responded.
- How test values have changed.
- Gaps in the history, marked to check.
- A short patient summary, ready before you see the patient.

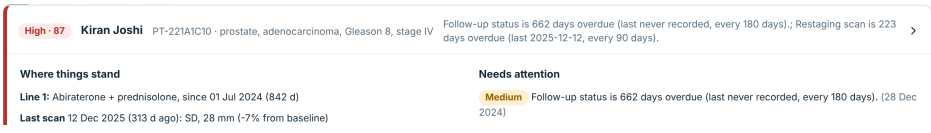
How the cancer responded



How test values changed



Short patient summary, ready before you see the patient



Sample data. No real patients.

Values that OncoJourney Platform brings to your clinic

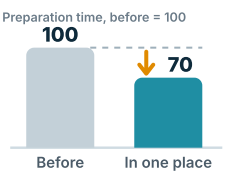
Everything in one place

Reports, treatments and results on one clear timeline.

Quicker team-meeting preparation

Each patient's story is ready to share.

About 30% less preparation time*



More time with patients

Less time searching, more time for the person in front of you.

Built for your hospital's own systems

- Runs inside your hospital's own systems, and patient data stays there.
- Helps you review the record. It does not diagnose and does not choose treatment.
- Every treatment decision stays with you.

Up and Running in Just Days

Free for three months, with no obligation to buy. After that, the choice is yours.
